ACHIEVEMENTS

GE AEROSPACE
Promoted based on expertise and passion. Continually rated as exceeds expectations on annual performance ratings.

1 of 10 selected across the DT organization for the 1st class of the Advanced Digital Technology Experience Program

Nominated for and attended GE Crotonville courses: Change Acceleration, Lean and Six Sigma, Influential Leadership, and Innovation

CERTIFICATIONS

CERTIFIED INFORMATION SYSTEMS SECURITY PROFESSIONAL (CISSP) - 2019

PROFESSIONAL PROFILE

Highly motivated, strategic thinker with proven ability to lead and influence cross-functional teams through large-scale, strategic projects & programs. Consistently able to breakdown complex problems, identify the root cause and accelerate implementation of effective solutions. Experienced in complex, global business processes, information technology systems, and internal controls over financial reporting. Ability to partner with multi-dimensional leadership teams to achieve common priorities globally.

EXPERIENCE

GE AEROSPACE
CINCINNATI, OH

Sr. Manager, Cybersecurity Governance – (April 2024 – Present)

- Lead a cross-functional team of 5 FTE and 10 contractors to deliver enterprise-wide GRC processes and improving coordination between stakeholders.
- Direct resource planning, prioritization, and performance management to align cyber governance activities with business objectives, while improving process efficiency and accountability.
- Drive continuous improvement initiatives that enhance governance maturity and operational effectiveness by utilizing project plans and visual management to proactively surface and resolve risks/roadblocks.
- Partner with executive leadership, risk, and control owners to define GRC strategy, align governance priorities with business objectives and maintain roadmap for governance capabilities.
- Lead enterprise readiness and successful completion of ISO 27001, 9001, 27701, 27017, 27018 and SOC 2 certifications, strengthening external trust and regulatory/contractual compliance.
- Optimize the GRC platform (Optro/Auditboard), enhancing control tracking, issue management and reporting, and realizing efficiency gains by centralizing governance, risk, compliance and audit processes.
- Oversee end-to-end SOX ITGC governance, ensuring IT risk assessment, training, readiness, SOC report review, control design, and remediation activities align with business objectives and reducing the number of issues consistently year over year.
- Direct the development and governance of application recovery plans, improving system resiliency and ensuring alignment with enterprise BCP/DR strategies.
- Leading the design and implementation of a unified controls framework within the GRC platform and driving ongoing efforts to operationalize it across cyber processes.

Sr. Staff Technical Program Manager, CMMC & Separations – (September 2022 – April 2024)

- Delivered key governance, risk, and compliance separation projects on time, strengthening Aerospace's GRC capabilities while building cross-functional expertise across IT, operations, and compliance.
- Led the implementation of our GRC module (Optro/AuditBoard), improving policy lifecycle management, compliance gap analysis, and issue management, while successfully decommissioning a legacy tool with zero downtime.
- Transformed the control retesting process using lean principles, reducing average SLA from 21 days to approximately 4 days and optimizing resource utilization for higher efficiency and throughput.
- Co-developed CMMC training modules for enterprise-wide rollout, increasing organizational awareness of cybersecurity requirements and reinforcing sustainable control practices.

ZACH SAVAGE

GE AEROSPACE (CONTINUED)
CINCINNATI, OH

Sr. Staff Digital Auditor, Aerospace IT SOX Controller – (Nov. 2020 – Sep. 2022)
Sr. Lead Digital Auditor, Aviation IT SOX Controller – (Jun. 2016 – Nov. 2020)
Sr. Lead Digital Auditor – (Aug. 2015 – Jun. 2016)

- Served as GE Aerospace's IT SOX Controller, leading the IT risk assessment and audit program to ensure SOX compliance across critical systems and processes.
- Directed and mentored onshore and offshore internal and external teams in planning and executing IT SOX assessments, ensuring consistent, high-quality testing and documentation.
- Advised IT senior executives and corporate leadership on IT risk posture, including testing results, control deficiencies, remediation progress, and emerging technology risks
- Embedded Lean and Agile practices into the assessment program (bowler metric scorecards, daily management, and standard work), reducing the audit and standard work), reducing the audit and assessment cycle by over 60% while maintaining quality.
- Acted as primary liaison to external IT SOX auditors, leading the transition from KPMG to Deloitte and achieving 85% reliance on control assessments in the first year.
- Managed critical systems classifications for new and existing (1000+) applications, ensuring the accuracy of risk level and related regulatory requirements.

LUXOTTICA RETAIL
MASON, OH

Sr. Systems Analyst, Financial and Accounting Systems – (December 2014 – August 2015)

- Utilized SQL, VBA and MaxL computer languages to optimize financial reporting functions by automating manual processes and reducing consolidation of the financial statements by 30%.
- Improved calculation and consolidation scripts within HFM and Essbase by rewriting existing code to increase the use of shared functions and methods, reducing the size of the code by more than 40% allowing easier maintenance of scripts and IT programs.
- Programmed automated nightly backups of all financial reporting databases to minimize business disruption.
- Managed the data flow from SAP to Essbase and HFM for business reporting.
- Created a workforce and impairment Essbase cube to allow the business to better manage FTE headcount expenditures, budgets and reporting of impaired stores sites.

Sr. IT Auditor – (February 2014 – December 2014)
IT Auditor – (June 2012 – February 2014)

- Executed the annual IT controls for the Sarbanes-Oxley [SOX] compliance program for Luxottica Retail North America, California based Oakley Wholesale, Retail and Manufacturing businesses and NY Wholesale.
- Improved efficiency of compliance testing by creating system and excel macros that performed various tasks including creating lead sheets, selecting automatic samples, uploading, and formatting files, pulling web-based information, and copying and moving files.
- Created and developed a program for continuous monitoring using ACL Analytic by leveraging saved queries and scripting along with redesigned IT testing strategies to incorporate more SAP tables to reduce labor hours spent validating key reports.
- Facilitated our general risk compliance [GRC] program to minimize segregation of duties issues for our LNRA and Oakley businesses.
